

“Smart Cities” - Energy Efficiency in the Infrastructure

New York City - June 27 to July 1, 2016

Berlin Energy & Mobility Consultants

BENCON ENERGIES

The company offers independent energy & mobility consulting services in Germany and internationally. BENCON ENERGIES specializes in customized energy and mobility concepts for residential and commercial buildings, integrated concepts for cities and municipalities as well as energy audits.

<http://www.benconenergies.com/>

The company is interested in meeting project developers, planners and consultants with a focus on buildings, energy supply, infrastructure and mobility.

cornelsen+seelinger Cornelsen+Seelinger

The company is an international planning team for architecture, urbanism and design. Its portfolio includes urban designs, residential housing, cultural and educational buildings, office buildings, infrastructure and transport construction, health care facilities and production buildings. The company develops innovative concepts and sustainable architectural solutions for refurbishments and extensions.

<http://www.cornelsen-seelinger.com>

The company is interested in meeting with developers and real estate management firms.

eco2heat

eco2heat is a global leading manufacturer of far-infrared heating products, which range from wall and surface heaters to therapy solutions. Their patented and certified far-infrared technology produces a safe, energy efficient, maintenance-free heat with a carbon-neutral footprint.

<http://www.eco2heat.us>

The company's target partners include HVAC distributors and retailers, developers and builders, architects, as well as government and public organizations leading energy efficiency and sustainability efforts.

eluminocity eluminocity

In cooperation with BMW, the start-up company developed a concept for urban infrastructures. The product called “Light and Charge” offers LED based light fixtures with integrated charging infrastructure for e-mobility solutions. This innovation makes the light and charge system a vital component of a Smart City. Additional modular sensor technology can be used in order to simplify parking solutions, waste management and demand-based lighting.

<http://www.eluminocity.com>

Their target partners include manufacturers, developers, architects, city planners and representatives from municipalities.

TRINIUS Life Cycle Performance
Sustainable Construction

Ingenieurbüro Trinius

Trinius has 20 years of experience in R&D, international standardization and consultancy in sustainable construction, or green building. Services include environmental life cycle assessment, declaration of environmental products, project cost optimization and economic viability, green building according to DGNB, LEED and BREEAM standards. The company offers an international perspective on sustainable construction.

<http://www.burotrinius.com/>

The company is interested in meetings with city planners, architects, real estate developers and green building professionals.

KLAPP & PARTNERS

The company operates in the fields of real estate project development and “green energy” projects. The main focus is on the development and marketing of innovative systems for the thermal conversion and drastic reduction of biogenic waste (municipal, commercial and industrial green waste, sewage sludge, fermentation residues, household waste and other organic waste) for CO2 neutral production of biochar as basis for revolutionary new organic fertilizers and soil-enhancer.

<http://www.3r-systems.de/en>

KLAPP & Partners is seeking to connect with investors, private and municipal waste disposal enterprises, agricultural holdings and biogas plant operators.

ODERGLAS

The company is one of the leading manufacturers for construction and façade glazing in Germany. Its main product is the heat insulating glass NEUTRALUX. The special glass coating prevents heat loss and therefor results in lower heating costs.

<http://www.oderglas.de>

The company is interested in meeting with metal construction companies, window manufacturers and architects.
